Institute of Macao Civil Aviation
Report from the Supervisory Committee for year 2007

We have read through the 2007 working report of the Board and also the financial statements and financial reports from the treasurer. We are all of the opinion that the Board and the treasurer has performed very well and the financial status of our Institute is sound and balanced. We should be able to carry out our aims smoothly with the continuous support from the Macau aviation entities, from the government entities, from our President, advisers and all of our members.

We wish that the new management would continue to take initiative in collaborating members to work for the benefits and development of the aviation industry.

Here ends the report.
